Welcome PingTone User

POP Summary

The POP Summary screen will give you an overview of the PSQM scores between Voice Firewalls (VFW) and Gateways. Scores are displayed for each active VFW to Gateway connection.

Customer Summary

The Customer Summary screen will give you an overview of all Customers and a rolling view of the average PSQM scores for all of their devices in real-time and 1 hour increments. From this screen you can drill down to see PSQM scores for individual devices belonging to a customer.

Customer Detail

The Customer Detail screen will give you an overview of all Active Devices on the Network. PSQM scores are displayed for each end-point to gateway combination. From this screen you can drill down to see the PSQM score history for an individual device.

Application Documentation

Online Application Documentation for GeoPacket's Call Quality Display (CQD) and Call Quality Analyzer (CQA) can be found in this section. Included are links to 3rd-party applications that may be incorporated into the CQD and CQA.

CQD Version : 1.1
CQD is a trademark of GeoPacket Corporation
